- Work on **CMMI Level 3 Appraisal** procedure and faced viva with LA on IRP and PPQA.

Dear Sir,

I am Md. Mahabub Al-Islam from Mirpur-2 Dhaka-1216. I am writing in response to your job notification for the position of Front-end Developer. I'm interested to work with **InNeed Intelligent Cloud** and believe that my qualifications and skills are the best matches for your requirements.

I have worked as a Junior Programmer at Spectrum Engineering Consortium Ltd. based in Kawranbazar, Dhaka. In this role, I have worked on several projects like ROC, G-ERP, SCB-CBRM and I were also a part of the R&D team. In the ROBI-ROC project, I have been able to learn how to make a TSD sheet for a project and run a python script to create a database using that script and also work using web forms of Dot Net. To be a part of the R&D team, I have learned how to work on and fit with new technology like Python, Docker Hub, etc. Currently, I'm working on the SCB-CBRM project, where I have to make Scheduled Bank System report for a Standard Chartered Bank.

I think I'm the right person for this position. Cause, I'm fully passionate about my work and a perfect team player. I have the ability to build strong communication with all team members. I would like to stay in a learning curve and love to solve problems and gather knowledge about new technologies.

I have attached my CV for your consideration. For more details about my works, you can visit my GitHub, Medium and LinkedIn profiles. Please contact me via cell phone, 01681416002 or E-mail me on mahabub13d1995@gmail.com

I look forward to speaking with you about this opportunity. Thank you very much for taking the time to review my CV.

Sincerely Yours,
Md. Mahabub Al-Islam
